## **Disclaimer**

The information presented and opinions expressed herein are those of the authors and do not necessarily represent the views of the American Society of Pediatric Hematology/Oncology (ASPHO). Any recommendations made by the authors must be weighed against the healthcare provider's own clinical judgment, based on but not limited to such factors as the patient's condition, benefits versus risks of suggested treatment, and comparison with recommendations of pharmaceutical compendia and other medical, pediatric, hematologic, and oncologic authorities.

## **ASPHO and the American Board of Pediatrics (ABP) Subspecialty Initial Certification Examination for Pediatric Hematology/Oncology**

ASPHO has no direct role or input into the development of the ABP Certification exam. ASPHO follows the model for the ABP Certification exam whereby the board is strictly firewalled from the membership organization to preserve the integrity of the exam. ASPHO, as the membership organization, will continue to develop test preparation courses and products without any "inside" knowledge about the exam questions. ASPHO relies on the publicly published material about the exam (such as the content outline), to develop its products.

By using ASPHO Knowledge Assessment Resource (KARE) you, the user, are agreeing to comply with and be bound by the above terms of use.
